# Cyber Fraud Task Forces

## CFTF

### *About the U.S. Secret Service Cyber Fraud Task Forces*

The mission of the U.S. Secret Service *Cyber Fraud Task Forces (CFTF)* is to prevent, detect, and mitigate complex cyber-enabled financial crimes, with the ultimate goal of arresting and convicting the most harmful perpetrators. Through a partnership with private industry, state, local, tribal, and territorial (SLTT) and federal law enforcement agencies, federal and state prosecutors, and academia, the CFTFs effectively leverage the collective expertise of a range of key stakeholders necessary to combat cybercrime. The CFTFs are staffed with special agents, technical experts, forensic analysts operating in the CFTF Digital Evidence Forensic Labs (DEFL), and SLTT task force officers trained through the Secret Service National Computer Forensic Institute (NCFI).
